

Coordinating occupational **safety** and **health protection**

***your partner
in risk management***

FPI 10 (C) 05-08

As a project manager, your responsibilities in the field of occupational health and safety protection require you to implement specific measures to ensure the required level of safety, both for the execution of construction work and for subsequent servicing/maintenance operations.

Socotec, tailored assistance

The task of coordinating occupational safety and health protection is often clearly defined by the laws in force. Socotec offers a partnership approach in the prevention of risks related to the simultaneous or successive interventions of different companies and subcontractors on your construction site.

► **During the design assessment phase, Socotec helps you to:**

- ▷ Integrate safety requirements into the building design,
- ▷ Draw up a General Coordination Plan (for health and safety protection),
- ▷ Compile the post-construction works and maintenance file.

► **Throughout the works execution phase, our teams will:**

- ▷ Organize the coordination of safety and health protection,
- ▷ Monitor the application of coordination measures on site,
- ▷ Manage the documents prepared,
- ▷ Monitor relations with institutional bodies.

Socotec, experience in safety.

Socotec has unparalleled knowledge of the techniques and practices used in the construction sector. The company has also acquired extensive experience in the field of safety, where it has built up an impressive track record over several years to gain the recognition of many institutional agencies and bodies.

And as with all Socotec services, the commission of coordinating health and safety is subject to quality control measures, including a commission quality plan, technical methodology, staff vetting procedure, and commission audits...
